I am Irish one time a year.

But I wish it was more.

I love the food, I love the drinks, I love the folk music, the violins playing with a great foot-stomping beat. My wife cooks the corned beef perfectly with those little spices and then we mix a nice ketchup and horseradish sauce to go with it. Cabbage is so simple and plain but a little salt and pepper and it is fun to chew on. And a simple boiled potato? Awesome! Add some Jameson Whiskey shots and some Killian red beer and you've got a great family time. Wear the GREEN! It's a lively color, full of notes of spring and the hopes of making money. MFJ products aren't green but some of them generate a lot of the green stuff. Here are the top four leaf clovers of our bunch!

MFJ-998RT

This beauty has a beautiful green PCB and it cost a little dough, but you get the satisfaction of tuning your antenna directly at the antenna. Super fast tuning. 100 Watts power handling. Includes Biastee.

ALS-1406

You need a matching amplifier for your expensive outdoor remote antenna tuner and this 1200W LDMOS Amplifier is just the ticket! Automatic bandswitching, 160-6 Meters, includes switching power supply. You will compete with the most powerful DXers!

The Cushcraft [MA-6B](#) gives you big impact on the airwaves with a small footprint! Its 7 foot 3-inch boom has less than 9 feet of turning radius. Contest tough -- handles 1500 Watts. The unique MA-6B is a two-element Yagi on
